

# Mounds View Public Schools Ends and Goals Policy

## **EG- 2104                      Use of Technology - Students**

The use of technology by students will be in compliance with Mounds View Public Schools regulations and applicable State and Federal laws.

The use of personally-owned and school-owned electronic devices on school grounds or at school supervised events is a privilege, not a right. The use of these devices will be governed by the restrictions and acceptable use paragraphs of this policy and all other District policies and regulations and all applicable laws. The Superintendent or his/her designee shall be responsible for the establishment of regulations and procedures to carry out this policy. The District may revoke the privilege to use this equipment for students who violate these policies and regulations or any applicable laws. In addition, the District may take disciplinary or legal action against students who violate these Policies and Regulations or any applicable laws.

The Mounds View School Board recognizes that making resources such as the Internet available to students carries some risks that students may encounter material on the Internet that is offensive or is otherwise not suitable for an educational environment. The District does not have the resources necessary to filter out all inappropriate material or to prevent students from inappropriately disclosing information about themselves on the Internet, nor is it technologically possible to do so. However, the School Board believes the benefits of providing students with access to the Internet outweighs the potential harm. In order to minimize these risks, the District will endeavor to educate students regarding how to responsibly use the District's computers and communication technology. The Superintendent or his/her designee shall be responsible for establishing procedures to carry out this policy.

### **Rationale:**

Mounds View Public Schools should utilize technology in compliance with all applicable State and Federal laws.
